SECTION - II - RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Draft Prospectus, including the risks and uncertainties described below and the Financial Statements incorporated in this Draft Prospectus, before making an investment in the Equity Shares of our Company. Any potential investor in, and subscribers of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled "*Business Overview*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" beginning on pages 95 and 187, respectively of this Draft Prospectus, as well as the other financial and statistical information contained in this Draft Prospectus. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality therein:

- Some risks may not be material at present but may have a material impact in the near future.
- Some risks may not be material individually but may be found material when considered collectively.
- Some risks may have material impact qualitatively and not quantitatively and vice-versa

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares and may also have an adverse effect on our business. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section.

You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. For further details, please refer to chapter titled "*Forward-Looking Statements*" beginning on page 14 of this Draft Prospectus.

Unless otherwise indicated, all financial information included herein are based on our Financial Statements. Please refer to the section titled "*Restated Financial Statement*" beginning on page 143 of this Draft Prospectus.

INTERNAL RISKS

- 1. *Volatility in the supply and pricing of our raw materials may have an adverse effect on our business, financial condition and results of operations.***

The principal raw materials used in our manufacturing process are aluminum Coil, adhesive film, LDPE etc. We do not have long term agreements with any of our raw material or inputs suppliers and we purchase such raw materials and inputs on spot order basis. Our top 10 suppliers for the

period ended June 30, 2021 have contributed 75.79% and for the financial year ended March 31, 2021, have contributed 72.96% of our total purchases. While we are not significantly dependent on any single raw material or inputs supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labor costs, labor unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials or stores & spares in the future, as and when we need them on commercially acceptable terms.

Further, there may be volatility in prices of our raw material and stores & spares and if we are not able to compensate for or pass on our increased costs to customers, such price increases could have a material adverse impact on our result of operations, financial condition and cash flows. Additionally, we may not be able to pass on every instance of increase in input cost and may have to pursue internal cost control measures.

2. *If we cannot respond adequately to the increased competition we expect to face, we will lose market share and our profits will decline, which will adversely affect our business, results of operations and financial condition*

Our products face intense competition from products commercialized or under development by competitors in all of our product portfolios. We compete with local companies, companies from the rest of world. If our competitors gain significant market share at our expense, our business, results of operations and financial condition could be adversely affected. Many of our competitors may have greater financial, manufacturing, research and development, marketing and other resources, more experience in obtaining regulatory approvals, greater geographic reach, broader product ranges and stronger sales forces. Our competitors may succeed in developing products that are more effective, more popular or cheaper than any we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Also, we face pressure on our margins due to pricing competition from several small and unorganized local players. Presence of more players in the unorganized sector compared to organized ones has resulted in increasingly competitive environment characterized by stiff price competition

3. *An inability to expand or manage our distribution network for business or the loss of any significant dealer may adversely affect our business and results of operations.*

We primarily sell our products to customers through our distribution network of dealers and distributors across India. As on the date of the Draft Prospectus, we have more than 79 distributors and 67 dealers. The competition for dealers and distributors is intense in our industry and many of our competitors including the large players continue to expand their distribution networks. There can be no assurance that we will be able to successfully expand, maintain or manage our distribution network and strengthen our relationship with our significant dealers in the future. If we lose any of our significant dealers to competitors, we may lose some or all favorable arrangements with such dealer and distributors, which could result in weakening or termination of our relationships with other dealers and distributors. We may also not be able to effectively manage our dealers and distributors, and the cost of any consolidation or further expansion of our distribution network may exceed the additional revenue generated from such efforts. Furthermore, the performance of our dealers and distributors and their ability to sell our products, strengthen our brand and expand their businesses and their sales network are crucial for the future growth of our business and would directly affect our sales volume and profitability. Our business is dependent on maintaining a continuing relationship with our most significant dealers and distributors as a significant portion of our revenues in our business is generated by a limited number of key dealers and distributors. An inability to develop and maintain our relationship with key dealers and distributors by providing new and quality products, effective branding and marketing for such products, attractive commercial arrangements, or effective training and network support for dealers, may result in the

loss of key dealers and distributors. There can be no assurance that we will be able to maintain or increase the historic levels of business from our key dealers and distributors, or that we will be able to immediately and successfully replace these key dealers and distributors at terms acceptable to us, should we lose any or all of them. Any loss of such key dealers and distributors may adversely affect our business, results of operations and financial condition.

4. There are outstanding litigation involving our Company, the Promoters and the Group Companies, which, if determined adversely, may affect our business operations and reputation.

Our Company, Promoters, Directors and Group Companies are involved in certain legal proceedings at different levels of adjudication before various courts, tribunals and appellate authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties by other statutory authorities, our Company, Directors, Promoters or Group Companies may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities and also adversely affect our reputation.

In the ordinary course of business, our Company and our Promoters are involved in certain legal proceedings, which are pending at varying levels of adjudication at different forum. The summary of outstanding matters set out below includes details of civil proceedings, criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving our Company, Promoters, Directors and our Group Company.

According to the Materiality Policy, any outstanding litigation, other than criminal proceedings, statutory or regulatory actions and taxation matters, is considered material if the monetary amount of claim by or against the entity or person in any such pending matter is in excess of 10% of Profit After Tax as per the restated financials or if an adverse outcome of any such litigation could materially and adversely affect our business, prospects, operations, financial position or reputation

Brief details of such outstanding litigation as of the date of this Draft Prospectus are set forth in chapter "Outstanding Litigation and Material Developments" on page 198 of this Draft Prospectus.

We cannot assure you that any of the legal proceedings described above will be decided in favor of the Company, the Promoters, Directors and the Group Companies, respectively. Further, the amounts claimed in these proceedings have been disclosed to the extent ascertainable, excluding contingent liabilities and include amounts claimed jointly and severally. Should any new developments arise, such as a change in Indian law or rulings by appellate courts or tribunals, additional provisions may need to be made by us, the Promoters, the Directors and the Group Companies in our respective financial statements, which may adversely affect our business, financial condition and reputation. We may incur significant expenses and management time in such legal proceeding. Decisions in any of the aforesaid proceedings adverse to our interests may have an adverse effect on our business, future financial performance and results of operations.

Further, our Company is not in possession of affirmed documents pertaining to litigation matters described in the chapter titled "Outstanding Litigation and Material Developments" beginning on page 198 of this Draft Prospectus. Accordingly, reliance has been placed on court orders, documents and undertakings furnished by the Company to describe the facts of litigation in the aforesaid chapter. Also, information with respect to the tax claims with respect to the Independent Directors of the Company are not available and therefore, we cannot assure you that all information pertaining to the above is accurate.

5. Our Promoter has provided personal guarantees to certain loan facilities availed of by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities, which in turn may adversely impact our cash flow, business and result of operations

As on June 30, 2021, our Promoter has provided personal guarantees as security to secure some of our existing borrowings and may continue to provide such guarantees post consummation of the issue. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter may be invoked and / or the security may also be enforced, which could negatively impact the reputation and net worth of our Promoter. In addition, our Promoter may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. Lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital,

which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

- 6. *We have not entered into any long term or definitive agreements with our dealers or customers. If our dealers or customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.***

We have not entered into any long term or definitive agreements with our dealers or customers, and instead rely on purchase orders to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Our customers do not, typically, place firm purchase orders until a short time before the products are required from us as a result of which, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production or sales. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences.

Additionally, our customers have high and exacting standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers' expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition

- 7. *There have been some instances of non-filing / delays / incorrect filings in the past with certain statutory authorities. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.***

In the past, there have been some instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC. There has also been an instance of non-compliance with the provisions of the Companies Act however, the Company is as on date in compliance with the requirements of the Companies Act in this regard. While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance and instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Draft Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

- 8. *Our business is dependent on the performance of the real estate, infrastructure and other related industries where our products are utilized. Uncertainty regarding the real estate market, infrastructure sector, economic conditions and other factors beyond our control could adversely affect demand for our products, our costs of doing business and our financial performance.***

Our products are primarily used in the real estate, infrastructure and related sectors. Adverse conditions in or uncertainty about these markets, or the economy could adversely impact our end-customers' confidence or financial condition, causing the reduction of demand for our products or delay purchasing or payment for those products. The performance of these sectors, and consequently the demand for our products in these sectors, are dependent on economic and other factors such as government policies, regulations and budgetary allocations as well as investments made in these industries and sectors. The financial performance of the end users of our products

and any adverse developments that affect the real estate, infrastructure and related sectors where our products are used may adversely affect our business, results of operations and financial condition.

9. Any disruption in production at, or shutdown of, our sole manufacturing facility could adversely affect our business, results of operations and financial condition

We own and operate only one manufacturing facility situated at Umbergaon, Gujarat. All of our products are manufactured at this facility only. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, and industrial accidents and similar events. Further, our manufacturing facility is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations

10. We require a number of regulatory approvals, registrations, licenses and permits in respect of our operations. Failure to obtain, maintain or renew licenses, registrations, permits and approvals in a timely manner or at all, may adversely affect our business and results of operations.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at the local, state and central government levels for doing our business.

While we have obtained all necessary and material approvals, licenses, registrations and permits from the relevant authorities, they may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business.

We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of these approvals are required to be transferred in the name of "Euro Panel Products Limited" from "Euro Panel Products Private Limited" pursuant to conversion and name change of our company and any failure or delay in obtaining such approvals or renewal of the same in a timely manner may adversely affect our operations.

We require a number of approvals, licenses, registrations and permits in ordinary course of our business. Additionally, we need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. We were a private limited company in the name of Euro Panel Products Private Limited. After complying with the relevant provisions and procedures of Companies Act, 2013, the Company was converted into public limited company, followed by the name change of the Company to - Euro Panel Products Limited. We shall be taking necessary steps for transferring the approvals in new name of our company. In case we fail to transfer/obtain the same in name of the company same may adversely affect our business or we may not be able to carry our business.

Any failure to apply for and obtain the required approvals, licenses, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licenses, registrations and permits would result in a delay in our business operations which could otherwise adversely affect our financial condition, results of operations and prospects of the Company. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions

thereof, or pursuant to any regulatory action. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations.

11. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “Financial Indebtedness” beginning on page 193 of this Draft Prospectus.

12. *We may be subjected to risks associated with product warranty*

Our products come with different periods of warranties between 7 to 10 years from the date of sale of the products against manufacturing defects. In the event of claimed defects or non-performance of our products, our practice is to accept such genuine claims and to replace such products. In the future, we might also face material number of warranties claims due to defects in our products. Defects, if any, in our products could adversely affect our reputation and demand for our products. In the event that defects, or warranty claims become more frequent, there may be an adverse effect on our operating results and financial condition

13. *We are subject to restrictive covenants under our credit facilities that could limit our flexibility in managing our business operations. Also, our lenders have imposed certain restrictive conditions on us under our financing arrangements*

There are restrictive covenants in the agreements entered into with our lenders. Certain covenants in these agreements require us to obtain prior approval / permission from our lenders in certain conditions. The agreements governing certain of our debt obligations include terms that require us to, among other things, take prior approval of our lenders for undertaking any change in capital structure, pledge, lien, consolidation, reorganization, dissolution, amendment or modification of our charter documents, etc. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. Such restrictive covenants in our loan documents may restrict our operations or ability to expand and may adversely affect our business. For details of these restrictive covenants, see the chapter titled “Financial Indebtedness” on page 193 of this Draft Prospectus

14. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply

of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

15. We have unsecured loans and advances from Promoters / Promoter Group Companies / Group Companies / Relatives of Promoter / Relatives of Directors, which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our business operations.

As per our Restated Financial Statements, as on June 30, 2021 and for the period ended June 30, 2021, we have unsecured loan of Rs 2,671.79 lakhs and 1,994.34 lakhs respectively from Promoters / Promoter Group Companies / Group Companies which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our liquidity and business operations. For further details of these unsecured loans, please refer to Chapter titled “Restated Financial Statements” beginning on page 143 of this Draft Prospectus.

16. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition

As per our restated financial statements, our cash flows from operating, investing and financing activities are as set out below:

Particulars	For the period ended June 30, 2021	(Rs. In lakhs)		
		FY 2021	FY 2020	FY 2019
Net Cash Generated from Operating Activities	(355.9)	673.2	988.9	620.6
Net Cash Generated from Investing Activities	(12.31)	(383.92)	(973.41)	(312.5)
Net Cash Generated from Financing Activities	529.37	(195.10)	114.05	(211.17)

For details, please see chapter titled “Management’s Discussion and Analysis of Financial Conditions and Results of Operations” beginning on page 187 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources.

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

17. We have in the past entered into related party transactions and may continue to do so in the future

Our Company has entered into transactions with our certain related parties. While we believe that all such transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please see section titled "Financial Statements" beginning on page 143 of this Draft Prospectus.

18. Our business prospers and continued growth depends on our ability to access financing at competitive rates and competitive terms, which amongst other factors is dependent on our credit rating. Any downgrade of our credit ratings may restrict our access to capital and thereby adversely affect our business and results of operations.

Our business depends on our ability to obtain funds at competitive rates. The cost and availability of capital, amongst other factors, is also dependent on our current and future results of operations and financial condition, our ability to effectively manage risks, our brand and our credit ratings. We may not be able to avail the requisite amount of financing or obtain financing at competitive interest rates if we fail to have favorable results of operations. We had been last rated by CRISIL for our borrowing as CRISIL BB+/Stable as long-term rating and CRISIL A4+ as short-term rating. Ratings reflect a rating agency 's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any downgrade made to our credit ratings could lead to high borrowing costs and limit our access to capital and lending markets and, as a result, could adversely affect our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

19. Information relating to the estimated manufacturing capacities and capacity utilization rates of our manufacturing facilities included in this draft prospectus is based on various assumptions and estimates. Actual production and future capacity utilization rates may vary from such estimated manufacturing capacity information and historical capacity utilization rates.

The information relating to the estimated manufacturing capacities and utilization rates of our manufacturing facilities included in this draft prospectus is based on various assumptions and estimates of our management. Actual production levels and future capacity utilization rates may differ significantly from the estimated manufacturing capacities of our manufacturing facilities and historical capacity utilization rates. In addition, capacity utilization is calculated differently in different countries, industries and for the different kinds of products we manufacture. Undue reliance should therefore not be placed on the manufacturing capacity information for our existing manufacturing facilities or the historical capacity utilization rate information included in this draft prospectus.

20. We are subject to various risks associated with the overseas markets in which we may operate, including but not limited to foreign currency exchange rate fluctuations and tax, if any. These risks may have an adverse effect on our business, prospects, results of operations and financial condition.

We derive our revenue from operations from both domestic and export sales. For the three months ended June 30, 2021 and for the years ended March 31, 2021, 2020 and 2019, our revenue from exports were Rs. 120.05 lakhs, Rs. 672.33 lakhs, Rs. 425.62 lakhs and Rs. 84.31 lakhs, respectively. Our Company exports to many countries namely Uganda, United States etc. Consequently, any adverse changes in these economies such as slowdown in the economy, acts of terrorism or hostility targeting these countries, etc. would directly impact our revenues and results from operations. In

the event of change in policies or laws in these regions with respect to quality standards, branding or restrictions on usage of certain products, imposition of anti-dumping duties, etc. our financial condition and business operations may be adversely affected. In case of any contingencies in future due to which we are unable to operate effectively in these markets, our results from operations, revenues and profitability may be adversely affected.

Further our financial statements are presented in Indian Rupees. However, our revenue from operations is influenced by the currencies of geographies to where we export our products. The exchange rate between the Indian Rupee and these currencies, has fluctuated in the past and our results of operations and cash flows have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. We may, therefore, suffer losses on account of foreign currency fluctuations for sale of our products since may not be able to pass on all losses on account of foreign currency fluctuations to our customers

21. Failure or disruption of our IT and/or business resource planning systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.

We have implemented various information technology ("IT") systems to cover key areas of our operations. We are dependent on technology in relation to customer order management and dispatches and financial accounting. We rely on our IT infrastructure to provide us with connectivity and data backup across our locations and functions. While the systems that we have implemented have enabled us to improve our working capital cycles, despite an increase in our sales over the period, we can provide no assurance that we will be able to do so in the future.

We believe that we have deployed adequate IT disaster management systems including data backup and retrieval mechanisms, at our manufacturing facilities. However, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to plan, track, record and analyze work in progress and sales, process financial information, manage our creditors, debtors, or otherwise conduct our normal business operations, which may increase our costs and otherwise adversely affect our business, financial condition, results of operations and cash flows.

22. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations

Our business is working capital intensive in nature and involves significant amount in trade receivables and inventories. Summary of our working capital position, based on the restated financials as at June 30, 2021 is given below:

(Rs. In lakhs)

Sr No	Particulars	FY 2019 (Audited)	FY 2020 (Audited)	FY 2021 (Audited)	For the period ended June 30, 2021
I	Current assets				
	Inventories	5,093.07	7,954.80	8,232.77	8,972.32
	Trade receivables	1,694.53	1,609.15	2,401.58	2,333.15
	Other current assets	559.60	717.46	675.79	703.05
	Total Current Assets (A)	7,347.20	10,281.41	11,310.15	12,008.52
II	Current liabilities				
	Trade payables	2,430.00	4,315.26	4,842.32	4,596.14
	Other liabilities	620.63	850.79	970.51	1,062.80
	Total current liabilities (B)	3,050.63	5,166.05	5,812.83	5,658.94
III	Net working capital requirements (A – B)	4,296.58	5,115.36	5,497.32	6,349.58

Our Company intends to continue growing by expanding sales orders. This may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funds, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “*Objects of the Issue*” beginning on page 76 of this Draft Prospectus.

23. *Any manufacturing or quality control issues may damage our reputation and expose us to litigation or other liabilities, which could adversely affect our financial results*

Being a manufacturer of Aluminium Composite Panels (ACPs), we are subject to significant regulatory scrutiny. Our manufacturing facility at Umbergaon, Gujarat, must manufacture products in accordance with parameters as laid down by the regulatory agencies, as applicable. Further, we are liable for the quality of our products for the entire duration of the shelf life of the product manufactured by us. After our products reach the market, certain developments in the products manufactured by our competitors could adversely affect demand for our products. Disputes over non-conformity of our products with such quality standards or specifications are generally referred to independent government approved testing laboratories. If any such independent laboratory confirms that our products do not conform to the prescribed or agreed standards and specifications, we shall have to bear the expenses of replacing and testing such products, which could adversely affect our business, results of operations and financial condition. We also face the risk of loss resulting from, and the adverse publicity associated with, manufacturing or quality problems. Such adverse publicity harms the brand image of our Company and products. We may be subject to claims resulting from manufacturing defects or negligence in storage and handling of our products. Any loss of our reputation or brand image, for whatsoever reason may lead to a loss of existing business contracts and adversely affect our ability to enter into additional business contracts in the future

24. *Our Company is dependent on third party transportation for the delivery of raw materials and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations*

Our Company uses third party transportation for delivery of our raw materials and finished goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition, such goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair ability to procure raw materials or delivery of goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations

25. *Introduction of alternative products caused by changes in technology or consumer needs may affect demand for our existing products which may adversely affect our financial results and business prospects*

Our products are mainly used in the infrastructure and construction sector. Our business is affected by change in technology, consumer needs, market perception of brand, convenience, health and safety norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in

preference of clients will affect our businesses and, in turn, will affect the demand for our products. Any failure to forecast and/or meet the changing demands of our businesses and consumer needs may have an adverse effect on our business, profitability and growth prospects

26. *Our insurance policies do not cover all risks, specifically risks like product defect / liability risk, loss of profits and terrorism. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss*

Our insurance policies consist of, among others, standard fire and special perils, earthquake, etc. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like product defect / liability risk, loss of profits, losses due to terrorism, etc. Further there can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

27. *Delays or defaults in client payments could result in a reduction of our profits. We may be subject to working capital shortages due to delays or defaults in payments by clients*

If client(s) default in their payments in due time to which we have devoted significant resources it could have a material adverse effect on our business, financial condition and results of operations and could cause the price of our Equity Shares to decline

28. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them*

Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company. Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations

29. *If we are unable to continue to implement our brand building and marketing initiatives, for our brands, our business and prospects may be adversely affected. Moreover, any deterioration in the reputation and market perception of our brands may have an adverse effect on our sales, profitability and the implementation of our growth strategy*

We operate under our brand "Eurobond". Our brand and reputation are among our important assets. The performance and quality of products are critical to the success of our business. The success of these products depend significantly on the effectiveness of the product design, quality of the raw materials, quality control systems, installation and after sales service, which in turn, depend on skills and experience of our personnel and our ability to ensure that such personnel adhere to our policies and guidelines. Any adverse change in the quality of products rendered by us including due to reasons beyond our control, or allegations of defects, even when false, at any of our manufacturing facilities could tarnish the image of our brands, result in negative reviews and feedback from our customers.

Further, our brand building would also depend on the effectiveness of sales and promotional activities and choice of channel partners. There can be no assurance that our efforts in these areas

would always be effective. Any adverse development or decline in our brand value and reputation may adversely affect our business, results of operations and financial condition.

30. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoters and Promoter Group will collectively own significant percentage of our equity share capital / voting rights. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoter will continue to exercise control over the Company, which may or may not conflict with interests of some or all of our creditors or other shareholders. Accordingly, we cannot assure that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares

31. *We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.*

We import our raw materials from other countries and export our products from India and payment for such transactions is paid / received in foreign currency. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

32. *Our industry is labor intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers*

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labor. Our industry being labor intensive is highly dependent on labor force for carrying out its business operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labor policies, and we may face the threat of labor unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

33. *The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.*

The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted. In late calendar 2019, COVID-19, commonly known as "novel coronavirus"

was first reported in Wuhan, China. Since then, the virus has progressively spread globally to many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorized the outbreak as a pandemic on March 11, 2020. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, manufacturing units of essential commodities were permitted to be functional. The team members have been working from home during lockdown and have been able to execute their responsibilities and service clients without any disruption, difficulty or delay. Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such a prolonged instance of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while conforming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the wellbeing of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India, and the impact of any actions taken by governmental bodies or health organization (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. To the extent that the COVID-19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this “Risk Factors” chapter

34. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company*

Since, the issue size is [●] lakhs, which is less than Rs 10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this issue. The deployment of these funds raised from this issue, is hence, at the discretion of the management and the board of directors of our company and our company’s management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard

35. *We may not be successful in implementing our business strategies*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations

36. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be impaired.*

Some of the agreements entered into by us may not be adequately stamped and registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute vis-à-vis the said premises and our noncompliance of local laws relating to stamp duty and registration may adversely impact the continuance of our activity from such premises.

37. *Our registered office and certain other locations used by us as warehouses are situated on leased premises.*

Our registered office is situated at 702, 7th Floor, Aravalli Business Centre, Ramdas Sutrale Road, Borivali (West), Mumbai 400092, Maharashtra, India which is taken on lease from Krishna Rajesh Shah. There can be no assurance that we will be able to continue to occupy the said premises in the future on commercially acceptable terms. If any of these lease or license agreements is terminated for any reason or not renewed on commercially acceptable terms or at all, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business, financial condition and results of operations. For further details please refer to Chapter titled "Business Overview" on Page 95 of Draft Prospectus.

38. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations. Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labor, workplace and related laws and regulations.*

We are also subject to environmental laws and regulations, including but not limited to:

- a. Environment (Protection) Act, 1986
- b. Air (Prevention and Control of Pollution) Act, 1981
- c. Water (Prevention and Control of Pollution) Act, 1974
- d. Hazardous Waste (Management, Handling and Transboundary Movement) Rules, 2008
- e. Public Liability Insurance Act, 1991

The above-mentioned enactments govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business. The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production

facilities for non – compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

39. *We may not be able to adequately protect our intellectual property, which could harm the value of our brand and services and adversely affect our business, financial condition, results of operations, cash flows and prospects.*

We consider our brand and intellectual property to be one of our most valuable assets and we believe the strength of our brand gives us a competitive advantage. We use our intellectual property rights to protect the goodwill of our brand, promote our brand name, enhance our competitiveness and otherwise support our business goals and objectives. Our business is dependent upon successfully protecting our intellectual property, including but not limited to our trademark etc. As part of our efforts towards ensuring their protection, we have successfully registered trademarks including its logo. We do not have any control over the registration of a trademark and a pending mark may not be granted registration for various reasons including being descriptive, non-distinctive or similar to a prior trademark

40. *We may, from time to time, look for opportunities to enter strategic alliances, acquire businesses or enter into joint venture arrangements. Any failure to manage the integration of the businesses or facilities post such acquisition or joint venture may cause our profitability to suffer.*

We may, from time to time, look for opportunities to acquire businesses or enter into strategic partnerships or alliances. Such acquisitions may not contribute to our profitability, and we may be required to incur or assume debt, or additional expenses beyond our forecasts or assume contingent liabilities, as part of any acquisition. Further, the acquisitions may give rise to unforeseen contingent risks relating to these businesses that may only become apparent after the merger or the acquisition is finalized. We may also face difficulty in assimilating and retaining the personnel, operations and assets of the acquired company. Further, we may not be able to accurately identify or forge an alliance with appropriate companies in line with our growth strategy. In the event that the alliance does not perform as estimated, or the inability on the part of our joint venture partner to meet the customer requirements may lead to a failure of such an arrangement which may adversely affect our business.

41. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition*

We maintain large amounts of inventory at our premises at all times. Although we have set up security measures, our operations may be subject to incidents of theft or damage to inventory. There can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future which could adversely affect our results of operations and financial condition. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

42. *Our Company does not have any similar and comparable listed peer which is involved in the same line of business for a direct comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue*

As on the date of this Draft Prospectus, we believe that none of the listed companies in India have a business profile and revenue streams along with their size, directly comparable to our Company. However, there are listed companies in India with one or more business segments that maybe common to our business. Since the listed companies may not be directly comparable to our Company, the accounting ratios of the same may not be a representative yardstick for our Company. Therefore, investors must rely on their own examination of our Company for subscribing to the Issue.

43. Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, sales and ability to meet customer demand

Our business involves manufacturing processes that may be potentially dangerous to our employees. Although we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facilities. An accident may result in personal injury to our employees, destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and / or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labor dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

44. Industry information included in this draft prospectus has been derived from various industry reports. There can be no assurance that third-party statistical, financial and other industry information is either complete or accurate

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

45. Our inability to meet our obligations under our debt financing arrangements could adversely affect our business, results of operations and cash flows.

As of June 30, 2021 and March 31, 2021, we had total borrowings, (fund based and non-fund-based limits) of Rs 5734.16 lakhs and Rs 5475.60 lakhs respectively. Our indebtedness could: (i) require us to dedicate a substantial portion of our cash flow from operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures; (ii) increase our vulnerability to adverse general economic or industry conditions; (iii) limit our flexibility in planning for, or reacting to, competition and/or changes in our business or our industry; (iv) limit our ability to borrow additional funds; (v) restrict us from making strategic acquisitions, introducing new products or services or exploiting business opportunities; and (vi) place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

We cannot guarantee that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, adverse changes in the business conditions affecting us could cause the amount of refinancing proceeds to be insufficient to meet our interest payments or fully repay any existing debt upon maturity and we may be unable to fund the payment of such shortfalls. If we cannot obtain alternative sources of financing or our costs of borrowings become significantly more expensive, then our financial condition and results of operations will be adversely affected.

46. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

47. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the NSE Emerge under SME Platform of National Stock Exchange of India Limited (NSE) in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the NSE Emerge under SME Platform of National Stock Exchange of India Limited (NSE). Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

48. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" beginning on page 142 of this Draft Prospectus.

49. Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

50. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press, media or investment community;
- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance

51. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur

There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholders ability to sell for the price at which it can sell, equity shares at a particular point in time

52. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition.

As on date of this Draft Prospectus, we have not made any alternate arrangements for meeting our capital requirements for some of the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 76 of this Draft Prospectus.

53. Our actual results could differ from the estimates and projections used to prepare our financial statements

The estimates and projections are based on and reflect our current expectations, assumptions and / or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and / or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

54. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or distributors will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

55. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India except any gain realized on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realized on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognized Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to

short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April, 2018 if the long-term capital gains exceed ₹1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April, 2018 in excess of ₹1,00,000/- p.a. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

56. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our restated financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "Presentation of Financial Industry and Market Data" beginning on Page 15 of this Draft Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited. India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity

Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

57. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

EXTERNAL RISKS

58. Political, economic or other factors that are beyond our control may have an adverse effect on our business, financial condition, results of operations and cash flows

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. Currently, we manufacture only in India and derive most of our sales in India, which are thus dependent on prevailing economic conditions in India. Our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, financial year or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- occurrence of natural or man-made disasters (such as hurricanes, typhoons, floods, earthquakes, tsunamis and fires) which may cause us to suspend our operations;

- civil unrest, acts of violence, terrorist attacks, regional conflicts or situations or war may adversely affect the Indian markets as well as result in a loss of business confidence in Indian companies; and
- epidemics, pandemics or any other public health concerns in India or in countries in the region or globally, including in India's various neighboring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 pandemic;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import / export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- financial instability in financial markets;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis;
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so; and
- other significant regulatory or economic developments in or affecting India

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, financial condition and results of operations, and the price of the Equity Shares.

59. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business

Our access to the debt markets and our costs of financing depend significantly on the credit ratings of India. India's sovereign rating decreased from Baa2 with a "negative" outlook to Baa3 with a "negative" outlook by Moody's and from BBB with a "stable" outlook to BBB with a "negative" outlook (Fitch) in June 2020; and from BBB "stable" to BBB "negative" by DBRS in May 2020. India's sovereign ratings from S&P is BBB- with a "stable" outlook. Any further adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any additional overseas financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business

60. Changing laws, rules and regulations and legal uncertainties, including any adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy

For instance, the Taxation Laws (Amendment) Act, 2019, a tax legislation issued by India's Ministry of Finance effective as of September 20, 2019, prescribes certain changes to the income tax rate applicable to companies in India. According to this legislation, companies can henceforth voluntarily opt in favor of a concessional tax regime (subject to no other special benefits / exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments

may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains tax on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities / tribunals / courts would have an effect on our profitability

Further, the Government of India has announced the union budget for Fiscal 2022, pursuant to which the Finance Bill, 2021 ("Finance Bill"), has introduced various amendments. The Finance Bill has received assent from the President of India on March 28, 2021, and has been enacted as the Finance Act, 2021 ("Finance Act").

The Finance Act has also clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

Any further changes in laws may have an impact on our results of operations. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the application, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future

61. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

62. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing

volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

63. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

INDUSTRY

INTRODUCTION

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

MARKET SIZE

According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDIs in the construction development sector (townships, housing, built up infrastructure and construction development projects) and construction (infrastructure) activities stood at US\$ 26.08 billion and US\$ 24.72 billion, respectively, between April 2000 and March 2021. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion.

The market is segmented by Top Coatings (PE, PVDF, and Other Top Coatings), Application (Interior Decoration, Hoarding, Insulation, Cladding, Railway Carrier, Column Cover & Beam Wrap, and Other Applications), End-user Industry (Building and Construction, Transportation, and Other End-user Industries), and Geography (Asia-Pacific, North America, Europe, South America, and Middle-East and Africa).

The Aluminum Composite Panel (ACP) market is expected to register a CAGR of over 6% during the forecast period. Aluminum Composite Panel (ACP) is a flat panel crafted out of two aluminum alloy sheets bonded with a non-aluminum core, in order to form a composite. It is used as cladding or facade material of buildings, insulation, and signage. In addition, ACPs have many applications associated with body paneling, in the automotive industry.

- Increasing demand for PVDF-based aluminum composite panels is expected to drive the demand for the market, during the forecast period.

- Availability of cheaper alternatives is likely to hinder the market growth.
- Large-scale investments on hotels in ASEAN countries are projected to act as an opportunity for the market, in the future.

KEY MARKET TRENDS

- ACPs are lightweight and have an impressive strength to weight ratio. They provide improved rigidity and durability, weather and UV resistance, superior thermal and sound insulations, and resistivity to harsh conditions, such as acids, alkali salts, and pollution.
- Owing to the aforementioned factors, they find widespread applications in interior decorations, claddings, building exterior wall insulations and coverings, and exterior and interior components of transportation vehicles, such as ships, trucks, and passenger cars, among others.
- The construction industry has been witnessing rapid growth since the past few years, mainly on account of the large investments and demand for infrastructure in the emerging economies, such as China, India, Brazil, and Russia, among others.
- Increased construction industry urbanization and development has led, especially in the Asia-Pacific and South America, to an increase in the demand for aluminum composite panels.
- In addition, high surface corrosion resistance and significant applications are expected to drive market growth in kitchens, bathrooms, walls, ceilings.
- Currently, the construction industry is majorly witnessing strong growth in the Asia-Pacific and Middle East & African regions.
 - In the Asia-Pacific region, India is anticipated to remain the fastest growing G20 economy. The Indian government announced a target of USD 376.5 billion investment in infrastructure over a period of three years, including USD 120.5 billion for developing 27 industrial clusters, and USD 75.3 billion for road, railway, and port connectivity projects.
 - In the Middle East, Qatar is expected to be among the fastest-growing construction markets, globally, till 2022. Qatar's construction market, with a projected growth of 12.1%, between 2017 and 2021, is expected to benefit from the investment in the preparations of the FIFA World Cup 2022, which is being hosted by Qatar. This is anticipated to further influence the growth in sales and applications of ACP in the construction sector, in that particular region.

All the aforementioned factors, in turn, are expected to increase the demand for the ACPs during the forecast period.

Asia-Pacific Region to Dominate the Market

- The Asia-Pacific region dominated the global market share. Factors, such as growing construction activities and preference for low maintenance building products, are favoring the market growth.
- Large-scale investments on hotels, by tourism departments of ASEAN countries, provide lucrative opportunities for the growth of the market, owing to their use in interior decoration purposes for aesthetic appeal.
- India is the fastest-growing construction market in the Asia-Pacific region. The construction sector in India has been growing rapidly, with increased investment by the government. The Indian government's 'Housing for All by 2022' is also a major game-changer for the industry.

- The country is likely to witness an investment of around USD 1.3 trillion in housing over the next seven years, where the country is likely to witness the construction of 60 million new homes. The availability of affordable housing is expected to rise around 70%, by 2024, in India.
- The increasing investments in the residential and commercial sectors, along with strategic initiatives by the Indian government, are expected to boost the construction sector in the country, which, in turn, is anticipated to drive the aluminum composite panel (ACP) market in India.
- Moreover, the growing interest of the companies, in exploring the rural markets in the region, has further aided the growth of the sector. The Government of India encourages foreign investment in the automobile sector and allows 100% FDI under the automatic route.
- Hence, with the rapid growth expected in the construction and automotive industries, demand for aluminum composite panels (ACP) in the region is expected to rapidly increase over the forecast period.

GROWTH DRIVERS

Increasing Demand for Strong and Lightweight Materials in Construction and Transportation:

In order to reduce structural weight, sandwich panels are used mainly when designing and constructing transport systems such as aircraft, Satellite, missiles and high speed trains. For the manufacturing of sandwich panels, aluminum composites are used, which in turn boost market growth over the forecast period. In addition, technical developments in the ACP sheets and panels production process are projected to have a huge impact on the overall market. Because of the eco-friendly characteristics of such products, increasing popularity of green buildings is also expected to fuel product needs. The incorporation of ACPs, is governed by various regulations and safety standards, such as LEED and British Safety Standards is favorable for Aluminium composite market. ACPs also offer high tensile strength and reduce the total weight of the frame, which makes it one of the ideal materials for modern construction industries.

CHALLENGES – ALUMINIUM COMPOSITE PANEL MARKET

- The costs and time involved in repairing aluminum panel, for producers could be a major challenge. However, such causes are avoided by new technologies as pre-made adhesive film and extrusion lamination, and the associated costs are fairly high and are thus a challenge.
- High price of raw materials: In terms of volatile availability and prices of core materials such as polyethylene core, aluminum metal and other coating materials, the growth of the aluminum composite panel market is limited. Compared to other construction materials, the raw materials of aluminum composite panels are also expensive and manufacturing costs are also high. Fluctuating crude oil prices and fluctuations in foreign currencies have led to increased cost of raw materials. The initial capital investment required is high to develop facilities for production smelting, refining and metal recovery. The bauxite-to-aluminum smelters are costly. The aluminum industry is power-intensive and consumes between 13,000-15,000 power units per ton, according to Metal World.

ROAD AHEAD

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of ₹. 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30.

India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for Development of Northeast to undertake strategic infrastructure projects for the region.

MANUFACTURING INDUSTRY

ROAD AHEAD

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2.5 trillion along with a population of 1.32 billion people, which will be a big draw for investors. The Indian Cellular and Electronics Association (ICEA) predicts that India has the potential to scale up its cumulative laptop and tablet manufacturing capacity to US\$ 100 billion by 2025 through policy interventions.

With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

PILLAR FOR ECONOMIC GROWTH

- Organised manufacturing is the biggest private sector employer in India. Overall, more than 30 million people are employed in the sector (organised and unorganised) and will become the engine of growth as it tries to incorporate the huge available workforce in India, most of who are semi-skilled.
- The sector will push growth in the rural areas where more than 5 million manufacturing establishments are running already. This will be an alternative available to the new generation of farmers.
- Government aims to achieve 25% GDP share and 100 million new jobs in the sector by 2022.
- The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025.

POTENTIAL TO BECOME A GLOBAL HUB

- India's manufacturing industry is already moving in the direction of industry 4.0 where everything will be connected, and every data point will be analysed. Indian companies are at the forefront of R&D and have already become global leaders in areas such as pharmaceuticals and textiles. Areas such as automation and robotics also receiving the required attention from the industry.
- Large international industrial producers such as Cummins and Abbott already have manufacturing bases in the country.

COMPETITIVENESS

- India has all the necessary ingredients for its major industrial push - a huge semi-skilled labour force, multiple Government initiatives like Make in India, high investments and a big domestic market.
- Necessary support infrastructure is being developed with areas such as power being the prime focus.
- Government incentives like free land to set up base and 24*7 power supply is making India competitive on a global scale.

CAPACITY UTILISATION IN MANUFACTURING SECTOR

- Capacity utilisation in the manufacturing sector is measured by Reserve Bank of India (RBI) in its quarterly order books, inventories and capacity utilisation survey.

- It indicates not only the production levels of companies but also the potential for future investment.
- As per the latest survey, capacity utilisation in India's manufacturing sector stood at 66.6% in the third quarter of FY21.
- As per RBI's Industrial Outlook Survey, manufacturing firms estimated further strengthening of production, orders and employment in the fourth quarter of FY21. Also, the first three months of FY22 are projected to record improvements in capacity utilisation, production, business improvement and employment generation.

NATIONAL MANUFACTURING POLICY

- National Manufacturing Policy was introduced in 2011 to increase the share of manufacturing sector in India's GDP to 25% and create 100 million jobs by 2021.
- The policy was introduced to create an enabling policy framework and provide incentives for infrastructure development on PPP basis.
- Under the policy, National Investment and Manufacturing Zones (NIMZ's) have been conceived as large industrial townships managed by a Special Purpose Vehicle (SPV). These SPV's would ensure planning of the zones, pre-clearances for setting up industrial units and undertaking other specific functions.
- Fourteen NIMZ's have already been granted 'in principle' approval while four of them have been given final approval.
- Central and State governments will provide exemptions subject to fulfillment of conditions by the SPV from compliance burdens for industries located in these zones.
- Exemption from Capital Gains Tax on sale of plant and machinery will be granted in case of re-investment of the capital gain amount for purchase of plant and machinery within the same or different NIMZ within three years of sale.
- A Technology Acquisition and Development Fund (TADF) has been launched for acquisition of appropriate technologies, creation of a patent pool and development of domestic manufacturing of equipment's for reducing energy consumption.

Revenue is measured at the fair value of the consideration received or receivable. The Company recognizes revenues on sale of products, net of cash discounts and turnover discounts, sales incentives, rebates granted, returns, sales taxes/GST and duties when the products are delivered to customer which is when title and risk and rewards of ownership pass to the customer.

Revenue from sales is recognized when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell/ consume the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract or the acceptance provisions have lapsed.

e) Property Plant and Equipment:

i. Tangible Assets

Fixed Assets are capitalized at acquisition cost, including directly attributable cost such as freight, Insurance and specific installation charges up to the point the asset is ready for its intended use.

ii. Intangible Assets

Intangible assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight line basis over their estimated useful lives. The amortization period and the amortization method are reviewed at least at the end of each financial year. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly.

Computer software which is not an integral part of the related hardware is classified as an intangible asset. The intangible assets are amortized over the period of 5 years of useful life.

Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised as income or expense in the Statement of Profit and Loss.

f) Depreciation/ Amortization:

Depreciation on Fixed Assets for the quarter ended 30th June 2021 and for the years ended 31st March 2021, 31st March 2020 and 31st March 2019 has been provided as per Straight Line Method (SLM) (i.e. calculated as per useful life of assets) as prescribed under Companies Act, 2013

g) Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset (property, plant and equipment or intangible) may be impaired. An asset is impaired when the carrying amount of the asset exceeds its recoverable amount. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. An impairment loss is reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had previously been recognised.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

h) Foreign currency transactions

a) Initial Recognition:

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

b) Conversion:

Monetary & Non-monetary items denominated in foreign currencies at the year-end are restated at the exchange rate prevailing on the date of the balance sheet.

c) Exchange Differences:

Exchange differences arising on the settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

i) Government Grant:

Government grants and subsidies are recognised when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidy will be received.

Export benefits are accounted for in the year of exports based on eligibility and when there is no uncertainty in receiving the same.

Other government grants and subsidies are recognised as income over the periods necessary to match them with the costs for which they are intended to compensate, on a systematic basis.

j) Investments:

Investment that are readily realisable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investments. All other investments are classified as long -term investments (non-current investments).

Current investments are carried at cost or fair value, whichever is lower. In case of investment in mutual funds, the net asset value of units declared by the mutual funds is considered as fair value.

Long-term investments are carried at cost. However, provision for diminution is made to recognise a decline, other than temporary, in the value of the investments, such reduction being determined and made for each investment individually.

k) Employee Benefits:

All short-term employee benefits are recognised at their undiscounted amount in the accounting period in which they are incurred.

Company's contribution to Provident Fund, ESIC & MLWF is accounted on accrual basis & charged to Profit & Loss Account.

Company is paying off Salary inclusive of Bonus, awards, ex-gratia, performance pay & other benefits to all employees as per company's policy.

In accordance with applicable Indian laws, the Company provides for gratuity. Gratuity provides a lump sum payment to vested employees, at retirement or termination of

employment, an amount based on the respective employee's last drawn salary and the years of employment with the Company and future increments. Liability with regard to gratuity is accrued based on valuations at the balance sheet date. Gain or loss is recognised immediately in the statement of profit and loss as income or expense. This liability is however not funded by the Company.

l) Borrowing Costs:

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use or sale. All other borrowing costs are charged to revenue.

m) Leased Assets:

Assets acquired under Leases where a significant portion of the risks and rewards of the ownership are retained by the lessor are classified as Operating Leases. The rentals and all other expenses of assets under operating leases are charged to the Statement of Profit and Loss on a straight-line basis over the period of the lease.

n) Earnings per share

The amount considered in ascertaining the Company's earning per share constitutes the net profit after tax. The number of shares used in computing basic earning per share is the weighted average number of share outstanding during the period. The number of shares used in computing diluted earning per share comprises the weighted average number of shares considered for deriving basic earning per share and also the weighted average number of shares which could have been issued on conversion of all dilutive potential shares.

o) Taxes on Income:

- i. Tax on income for the current period is determined on the basis of estimated taxable income and tax credit computed in accordance with the provisions of the Income-tax Act 1961 and based on expected outcome of assessments / appeals.
- ii. Deferred tax is recognized, subject to the consideration of prudence in respect of deferred tax assets, on timing differences, being the difference between taxable income and accounting income that originate in one period and capable of reversal in one or more subsequent periods.
- iii. Minimum Alternative Tax (MAT) Credit is recognised as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period.

p) Provisions, Contingent Liabilities and Contingent Assets:

Provisions are recognized in the financial statement in respect of present probable obligations, for amounts which can be reliably estimated. Contingent Liabilities are disclosed in respect of possible obligations that arise from past events whose existence would be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six working days.

Phase II:

Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III:

The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.
